

CM Revanth Reddy directs officials to maximise utilisation of Godavari waters

Hyderabad, Aug 12 (GNS): Telangana Chief Minister A Revanth Reddy on Wednesday directed officials to maximise the utilisation of Godavari waters by carrying out water lifting operations to the fullest extent from the Yellampalli, Devadula and Sitarama projects. Revanth Reddy, accompanied by Irrigation Minister Uttam Kumar Reddy, reviewed the functioning of the Irrigation Department at MCRHRD here. He directed officials to strictly follow the National Dam Safety Authority (NDSA) guidelines, noting that water was not being stored in the Sundilla, Annaram and Medigadda barrages as per the recommendations, an official statement said.

Uttam Kumar said significant defects had been identified in the Medigadda and Sundilla barrages. The Chief

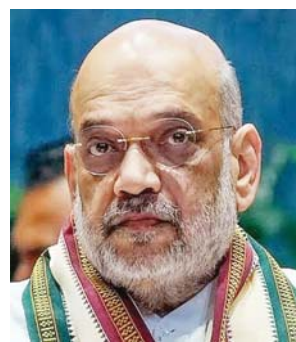

Minister suggested consulting the NDSA on the issue. The Minister said water lifting was currently being carried out with nine pumps at the Devadula project, which was unprecedented in the past. Revanth Reddy directed officials to resolve minor issues affecting lifting operations at the Devadula and Sitarama projects on priority. The Chief Minister

also ordered an action plan to clear pending compensation for villages and agricultural lands affected by irrigation projects. Irrigation and Revenue officials were directed to conduct field visits and submit factual reports on villages vulnerable to inundation, compensation and rehabilitation issues. He said immediate compensation should be paid

to villages facing an imminent impact, which would help pave the way for filling the Baswapur and Gauravelli projects. Revanth Reddy further ordered a comprehensive study on enhancing the capacity of the Gattu and Gudendoddi lift irrigation schemes and directed officials to appoint a consultant for the Gudendoddi pumped-storage project.

Amit Shah says ready for discussion on all issues related to NEET

New Delhi, Aug 12 (GNS) Union Home Minister Amit Shah on Wednesday dared the opposition to submit a formal letter to the Lok Sabha speaker for a debate on students' protests and all related issues, and said he will attend the entire proceedings to address all questions if the discussion begins today, August 12. Speaking to reporters in the Parliament House complex, he said it was now up to the opposition whether they want to take part in the debate or to create turmoil in Parliament. "Even today, I say that they should submit a letter to the Speaker by 2 pm. We are ready for all kinds of discussions from 3 pm today until 3 pm tomorrow," Shah said, asserting that the government has nothing to hide. The home minister's remarks came just a day before the Monsoon Session comes

to an end after prolonged disruptions of the proceedings in both Houses of Parliament. The protests and sloganeering by the opposition initially started over the NEET paper leak and alleged embezzlement of donations at the Ram temple in Ayodhya. The opposition later pressed for a discussion on the police action against students protesting over the NEET paper leak and also demanded the presence of Prime Minister Narendra Modi and the home minister, and their statements.

Asked about the opposition charges that he was running away from the debate, the home minister took strong exception to the claim and said words like "missing" and "fugitives" are terms that have only recently begun to be heard in India's public and parliamentary discourse. He said ever since the Parliament session began on July 20, he has been coming regularly and sitting in his chamber in the Parliament House, but the opposition is not allowing the either House to function. "So, what is the point of anyone going inside when the proceedings are not being allowed to run? As far as the issue of discussion is concerned, Parliamentary Affairs Minister Kiren Rijiju has made it very clear that the government is ready for a discussion on all aspects of the students' protests re-

lated to the NEET issue," he told reporters outside Parliament's main entrance 'Makar Dwar'. On Monday, Rijiju announced that the government is ready for a full-fledged discussion in Lok Sabha on students' protests and police action across the country, and that Shah will give a reply to the debate, provided the opposition promises not to disrupt and listens peacefully. Pointing to the opposition's initial demand that time be allotted for a discussion, Shah said he had made it clear that he was ready to answer all questions in Parliament. "But they simply do not want the discussion to take place. Now, let the people decide who is actually running away," he said, adding that he is also ready to discuss why the opposition "does not" want a discussion.

Digital DBT food subsidy scheme to launch in Chandigarh, DNH

New Delhi, Aug 12 (GNS): The Centre will launch the Central Bank Digital Currency (CBDC)-based Direct Benefit Transfer (DBT) under the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) in the Union Territories of Chandigarh and Dadra & Nagar Haveli on August 14, a day ahead of Independence Day, according to an official statement issued on Wednesday. Under the CBDC-based DBT model, eligible PMGKAY beneficiaries will receive their food subsidy directly into their CBDC wallets instead of conventional bank account transfers. The subsidy can then be used to purchase foodgrains from empanelled merchants through

a secure, traceable and real-time digital payment mechanism, the statement said. Union Consumer Affairs, Food, and Public Distribution Minister Pralhad Joshi, Punjab Governor and Chandigarh Administrator Gulab Chand Kataria, and Union Agriculture Minister Shivrang Singh Chouhan will be present at the event along with senior officials. Chandigarh and Dadra & Nagar Haveli are set to become the first Union Territories in the country to operationalise food subsidy transfers to all eligible PMGKAY beneficiaries in the form of programmable Central Bank Digital Currency (CBDC - Digital Rupee) tokens directly into their CBDC wallets.

Parliament panel finds Justice Varma guilty in cash-at-home case

New Delhi, Aug 12 (GNS): Justice Yashwant Varma, facing removal proceedings over the alleged discovery of unaccounted cash at his official residence, has been found guilty on all three articles of charge by the three-member Lok Sabha inquiry committee. The committee, in its report tabled in both Houses of Parliament on Wednesday, concluded that "Article I is proved", "Article II is proved" and "Article III is proved", leaving little ambiguity in its findings on the controversy that erupted after burnt currency was allegedly found at the judge's residence last year. On the first charge, the panel said "substantial unexplained

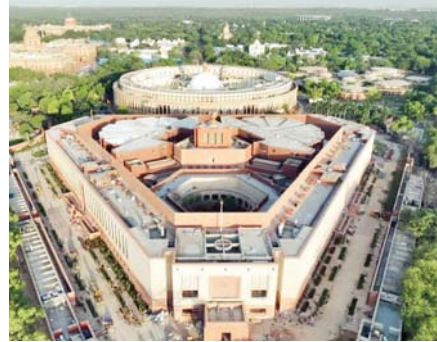

Rs 500 denomination currency notes" were found in the storeroom situated within Justice Varma's official residential premises at 30, Tughlak Crescent, New Delhi. The judge, it said, "failed to furnish a satisfactory explanation regarding the presence, source or ownership thereof". The panel also held Justice Varma responsible for the failure to preserve material

evidence. Finding Article II proved, it said the evidentiary condition of the storeroom had been disturbed before lawful sealing and inspection, while the later non-availability of the currency notes remained unexplained. Significantly, the committee clarified that its finding did not rest on proof that Justice Varma personally removed the cash. Instead, it said the finding was based on his "failure to preserve, acquiescence in disturbance through the establishment attached to the premises, and resulting loss of material evidence". The committee was equally scathing about the explanation furnished by the judge.

Amid uproar, FCRA Bill referred to JPC

New Delhi, Aug 12 (GNS): : The government on Wednesday referred the controversial Foreign Contribution (Regulation) Amendment Bill, 2026, to a joint parliamentary committee for wider consultation. The committee will have to submit its report to Lok Sabha Speaker Om Birla by the last day of the first week of the winter session. The committee will have 31 members — 21 MPs from the Lok Sabha and 10 from the Rajya Sabha. Birla will nominate 21 members from the Lok Sabha while Upper House chairperson CP Radhakrishnan will nominate 10 members from the Rajya Sabha. Minister of State for Home Affairs Nityanand Rai moved the motion in the Lower House to send the Bill to a joint parliamentary committee amid a din in the House, as Opposition members continued their protest seeking the Home Minister's statement on the police action against students last month during their stir against the NEET paper leak. The government's move came amid widespread opposition to the Bill by various Christian organisations and the chief ministers of

Mizoram, Meghalaya and Nagaland, who have expressed concern regarding some of its provisions. Several parties, including the Congress, Trinamool Congress and the DMK, have also been opposing any move to pilot the draft law. The main area of contention is the creation of a competent authority, which will be empowered to take over assets of NGOs whose licences have either expired or have been cancelled. Introduced in the Lok Sabha on March 25 this year, the Bill provides for greater government scrutiny of NGOs and foreign funding, and explicitly bars the use of such finances for religious conversions.

India Navy Chief meets Mauritius PM, reviews maritime security cooperation

Port Louis, Aug 12 (UNI): Indian Navy Chief Admiral Krishna Swaminathan on Wednesday called on Mauritius Prime Minister Navinchandra Ramgoolam, holding discussions on ways to deepen maritime security cooperation between the two friendly countries. According to the Indian Navy, India's High Commissioner to Mauritius, Anurag Srivastava, was also present during the meeting. "Discussions during the meeting were centred on strengthening maritime security cooperation, training exchanges, information exchange mechanisms, capacity building efforts and operational linkages between the Indian Navy and the Mauritius National Coast Guard," the

Indian Navy posted on X. Admiral Swaminathan assured PM Ramgoolam of full support, assistance, cooperation and collaboration of the Indian Navy in the capability enhancement and capacity building endeavours of the Mauritius Police Force and National Coast Guard. On Tuesday, the Indian Navy Chief held a series of

talks with senior officials of the Mauritian government, exploring new avenues for collaboration between the two countries. The officials included Rampersad Soorojeebally, Commissioner of Police, Mauritius Police Force and Kan Oye Fong Weng-Poorn, Secretary for Home and Defence Affairs, Government of Mauritius.

India, Southern African customs union sign terms of reference towards trade pact

New Delhi, Aug 12 (GNS): The government on Wednesday said that India and the Southern African Customs Union (SACU) have signed the Terms of Reference (ToR) for negotiations towards a Preferential Trade Agreement (PTA) between India and SACU, marking an important step towards strengthening trade and economic engagement. The negotiations seek to provide preferential market access to an already established commercial relationship, with significant complementarities in engineering goods and machinery, automobiles, pharmaceuticals, textiles, agriculture and agri-processing. Calling for a balanced, fair and equitable trade

agreement between India and the SACU, Commerce and Industry Minister Piyush Goyal emphasised the partnership can help diversify markets and create opportunities for both sides to prosper. Goyal said India can play an important role in supplying affordable medicines and supporting the development of new talent in the IT sector in the SACU

region. India can also help integrate SACU countries into global supply chains in areas where their businesses are competitive and where skills and talent can be developed or are already available. According to Goyal, India's engagement with Southern Africa is rooted in a longstanding partnership of equals and extends well beyond trade.

Manipur CM gives 15-day deadline to surrender illegal arms

Imphal, Aug 12 (UNI): Manipur Chief Minister Yumnam Khemchand Singh on Wednesday appealed to people possessing illegal weapons in both the hill and valley regions to surrender them within 15 days or face action as per the law. Addressing a function organised for the display of recovered arms, ammunition and explosives at the 1st Battalion Manipur Rifles Parade Ground in Imphal, the Chief Minister urged those in possession of illegal arms to hand them over through their respective MLAs or the District Superintendent of Police. The display of the recovered arms, ammunition and explosives was organised as part of the government's initiatives aimed at restoring normalcy and

strengthening peace and security in the state. Khemchand Singh said that those who fail to surrender illegal weapons within the stipulated 15-day period would face action in accordance with the law. The Chief Minister said the state's development had been adversely affected since ethnic violence broke out in Manipur on May 3, 2023. He appealed to all sections of society to cooperate with the government and security agencies in restoring peace and ensuring normalcy in the state. The Chief Minister said that after the inception of the new govt on February 4, 2026, peace outreach initiatives were undertaken in various districts to bring lasting peace in the State.

India’s strategic pillars are crumbling. Complacency is not an option

Gen MM Naravane (Retd)

The global order is once again in a state of flux, overtaken by multiple crises that have shattered old convictions and exposed new vulnerabilities. In this altered landscape, India must urgently recalibrate its national security policy and defence architecture to meet the demands of a more volatile, multipolar world. The wars in Gaza and Ukraine rage on with no clear end in sight, each serving as a proxy battlefield for deeper geopolitical rivalries, with the last round of Putin-Trump talks on Ukraine, held at Anchorage, Alaska, not making any significant breakthrough. Meanwhile, the US, the self-appointed global policeman, has turned inward and belligerent, unleashing a tariff war that has upended global trading norms and strained relations with erstwhile allies. India, caught squarely in the crosshairs of these upheavals, finds itself in a precarious position. Its principal adversary, China, has deepened its strategic partnership with Pakistan. The US, under the Trump administration, has grown openly hostile, with Pakistan Army Chief Asim Munir even issuing nuclear threats from American soil. Compounding these challenges is the deterioration in US-India relations. President Trump’s tariff blitzkrieg of imposing duties of up to 50 per cent on Indian goods, has been vaguely justified

on the grounds of India’s continued trade with Russia, particularly in oil and defence. However, there is a softening of the US stance on secondary sanctions related to oil imports after the talks at Anchorage. The irony is that the same administration which once hailed India as a counterweight to China now penalises it for pursuing strategic autonomy. The optics of Munir being hosted at the White House and issuing threats from Florida have not gone unnoticed by the strategic community in India, driving home a stark message that we can no longer rely on the US as a consistent strategic partner. India’s strategic calculus is based on a few pillars: a robust deterrent posture against China and Pakistan; a growing partnership with the United States; and a commitment to multilater-

alism through forums like the UN, SCO, and BRICS. But each of these pillars is now under strain. China’s aggression along the Line of Actual Control, its naval assertiveness in the Indian Ocean, and its deepening ties with Pakistan—manifested in joint military exercises, intelligence sharing, and infrastructure projects under the China-Pakistan Economic Corridor—pose a multi-dimensional threat. Pakistan, emboldened by Chinese backing and the militarisation of its polity, has escalated both its rhetoric and capabilities. Munir’s recent threats to target Indian economic assets such as the Jamnagar refinery and other intemperate remarks on nuclear retaliation while on US soil mark a dangerous new phase in Pakistan’s strategic signalling. Compounding these chal-

lenges is the deterioration in US-India relations. President Trump’s tariff blitzkrieg of imposing duties of up to 50 per cent on Indian goods, has been vaguely justified on the grounds of India’s continued trade with Russia, particularly in oil and defence. The irony is that the same administration which once hailed India as a counterweight to China now penalises it for pursuing strategic autonomy. The optics of Munir being hosted at the White House and issuing threats from Florida have not gone unnoticed by the strategic community in India, driving home a stark message that we can no longer rely on the US as a consistent strategic partner. In light of these developments, India must undertake a comprehensive overhaul of its national security doctrine. In light of these

developments, India must undertake a comprehensive overhaul of its national security doctrine. First, it must embrace the reality of a multipolar world and diversify its strategic partnerships. While the Quad remains important, India must also deepen ties with middle powers like France, Japan, and Australia, and explore new alignments with ASEAN, Africa, and Latin America. A new ‘Quad’, comprising Australia, Japan, and India, and including other countries of the South China Sea littoral—most notably the Philippines, which has shown the gumption to stand up to Chinese bullying in the region—must be explored. In this period of uncertainty, it is very unlikely that the Quad summit scheduled to be held in India later this year will materialise.

India’s amphibious operations depend on contingencies. Can the Armed Forces adapt?

Harsh V. Pant
Ankit K

The Chief of Defence Staff, General Anil Chauhan, along with the three services chiefs, formally released India’s Joint Doctrine for Amphibious Operations earlier this month. As per the official statement, the declassified doctrine outlines the framework for planning and execution of amphibious operations by integrating maritime, air and land domains. The doctrine highlights interoperability, rapid response capability and jointness to undertake such operations. Its focus on jointness with unprecedented civil-military fusion is part of India’s ongoing effort to plan for mobilisation at the national level. The timing of the declassification is particularly crucial given the recent challenges India faces from both Pakistan and China at land and sea. While there exist several constraints in the operationalisation of the doctrine, capability development in niche technical areas, institutional adaptation, and strategic signalling will be the most challenging of all. The command and control structure envisaged in the doctrine looks into the role of undertaking joint operations by all the services, keeping in mind the current organisational structure of the Indian Armed Forces. Dual hatting provisions, that is, a military commander taking on multiple

responsibilities and shifting between operations, is also a sign of change that probably stems from India’s past experiences in amphibious operations. To leverage existing interservice coordination, the doctrine advocates for the establishment of Amphibious Force Headquarters while raising specialised capabilities at a steady pace. Emphasis is also accorded to component commanders during the planning phases. This is followed by clear hierarchical authority during the execution of an operation, thus prioritising an evolved understanding of joint planning. This serves to operational effectiveness when unity at the command level becomes paramount. This approach also acknowledges the domain expertise that each of the services brings while ensuring deci-

sive leadership during critical phases of the operation. The doctrine also puts emphasis on the idea of Ships Taken Up from Trade (STUFT) and civilian aircraft requisitioning in times of crisis to build amphibious capability within the budget constraints. Understanding characters of modern warfare as inclusive from the global experiences, the doctrine also approaches modern warfare’s total-national character, where military and civilian resources must be seamlessly integrated. The detailed procedures for civil integration suggest intense institutional planning for large-scale operations that would require national mobilisation at the highest level. Integration of specialised capabilities, such as the Amphibious Beach Units (ABU) and medical support teams,

is aimed towards capability development. What is particularly interesting is the idea of an alternative organisation “in the absence of” specialised units that will undertake certain specific tasks in an operation within the current force structure. With respect to the sustenance of abled fighting troops and civilian contingencies, detailed medical support provisions, including surgical teams and hospital ship concepts, are part of comprehensive planning for humanitarian aspects of military operations. This is particularly with respect to the casualty care and evacuation considerations, human costs of amphibious operations and the need for robust medical support infrastructure. The emphasis on “over the horizon” operations and Ship-to-Objective Manoeu-

vre (STOM) capabilities understands modern threat environments rather than operational limitations. The detailed operationalisation of stand-off beaching techniques is to have real-time awareness of contemporary anti-access capabilities of the adversary, while developing credible responses to them. This is in consonance with the changing nature of amphibious operations that will occur in contested environments against technologically sophisticated adversaries. Given the nature of multiple threat vectors, including unmanned systems, cyber warfare, and electronic countermeasures, the doctrine addresses operationalising effective measures to counter them. This positions India ahead of many nations in preparing for multi-domain threat environments.

Multi-Disciplinary Linguistics Programs- Future Ahead

Linguistics as a subject has grown of late in our country. Communication is the foundation for a person’s success. Language is considered as the means of communication. Language originated from attempts to imitate natural sounds. It has been considered that to be a great language, it needs to be informative, expressive, directive, aesthetic and phatic. There are many components of a language. They are phonemes, morphemes, lexemes, syntax and content. Based on this, linguistics has five components viz., phonology, morphology, syntax, semantics and pragmatics. If we take that into consideration, linguistics is the scientific study of language. Panini, a great sage who lived in 6th Century BC is the father of Sanskrit grammar, when he wrote a treatise named Ashtadhyayi. After that the Greek took over the linguistics area. Many Universities in India had started the trend of having Departments in Linguistics. Earlier, those with English and Regional and National Language were considered for the positions in Linguistics. However, now we have many who have completed Ph.D. in Linguistics from major Universities. This would ensure that there is steady flow of teachers into the system. University of Pennsylvania records that religious concerns underlay the study and preservation of texts, and with the spread of Buddhism to China and Japan, the concern for careful study of language spread to East Asia as well. Thus, Linguistics was originally a concern about preserving the purity of texts, especially the Vedic Hymns, so that they would be effective when invoked. This concern with being careful about language, has been perpetuated as a strong cultural value in South Asia, and by the spread of Buddhism, to Asia in general. This corroborates the narrative that linguistics is basically from the Indian sub-continent. Tholkappium by Tholkappiar in Tamilnadu also dates to 1500 CE. Linguistics therefore roughly follows the course of human cultural evolution, the emigration of communities and growth of interest. The study of linguistics and its history of growth and development has had to describe in depth to uncover historical facts through phonology and phonetics. The oldest Department of Linguistics in India that offers a postgraduate program is the Department of Linguistics at the University of Mumbai and it’s known for its research-oriented programs and intensive training in the field. Many of the Northern And Southern Universities started the Departments. For Cluster University of Jammu, since its inception, Department of Linguistics and Literature was started and now this year onwards, the Department is offering the Integrated Programme in Linguistics. The response for the program is excellent. Earlier, the students used to travel to Punjab and Himachal for the program and now it’s available in Jammu itself. Linguistics as a Department cannot function alone. There is a need to embrace technology since Language laboratories play a vital role in shaping the subject considering phonology and phonetics. Linguistics has the roots in the area of Anthropology. It deals with the place of language in its wider social and cultural context, and its role in making and controlling cultural practices and societal structures. Similarly, Sociolinguistics studies the social functions of language and the social, political, and economic relationships among and between members of speech communities. There can be more specialised fields which the students can opt including ethnolinguistics. Say in Jammu region of the Jammu and Kashmir, there is a need to assess the socio and ethnic aspects of linguistics of the Dogra community. Research in this field can throw light on their contributions and the societal development. The emergence of Dogri language and the script can be considered to be an area of research. While studying the languages like Sanskrit and the older languages can help in their development and this study can offer Certificate Programs in Philology. These studies can throw light on the contributions and other development in various languages and also why some of the languages have since lost its relevance. Akhand Bharat had its own languages after every 50 km radius and many of the languages have been cut short either by the Mughal invasion or by the British rule. It is hence essential that the linguistic researchers need to unearth these aspects and bring it back to the records and set the system right. Technology has a great impact on linguistics with the new developments in text to speech, speech to text and grammatical corrections through Grammarly. There is a growing trend for connecting the Digital to the Linguistics which is reflected in new programs to be offered like Digital Linguistics, Digital Phonetics etc.. The impact of Internet is profound in Linguistics is such that the way the subject is being taught will undergo changes. Translational studies, Computational linguistics will be much sought after in near future. Already Cluster University of Jammu is involved in DLT programs and in addition the students are visiting local communities by our faculty. They are getting the data needed for fostering the linguistic similarities and dissimilarities. However, I think the Universities across the countries have to brace for incorporating some of the areas like Artificial Intelligence in Language Analysis, Digital Pedagogy in Language Teaching, Cognitive Studies, Artificial intelligence Driven Literary Analysis, Neuroaesthetics along with Multilingualism. It is high time that Engineering discipline is also routed along this direction and linguistics through Artificial intelligence, Machine learning, Language processing etc. Translational Engineering has direct impact on the linguistic aspects and can be utilised. Now that auto correct, spell check, i-thenticate, Paper and others are there, languages are undergoing lot of changes. Oral communication has also undergone changes including the advent of Chat GPT, Perplexity etc. These have changed the way a person communicates. Hence there is opportunity in these areas for research and higher studies. Linguistic technology gets cross sectional and multi-disciplinary studies from linguistics, computer science, mathematics, and statistics. Natural Language Processing deals with the inter linkage of linguistics and computer science. It is considered as a subfield of Artificial Intelligence and Big Data processing on how to teach language to computers. All Universities need to rethink on the present status of the Linguistic Departments and align the same with multi-disciplinary subjects embracing technology so that the future is bright for the students opting for this unique and novel program. The future of linguistics also lies in preserving linguistic diversity while adapting to rapidly changing patterns of communication. India, with its vast number of languages, dialects and scripts, offers an enormous field for documentation and research. Universities can establish digital archives of endangered languages, oral traditions, folk literature and indigenous knowledge systems. Such initiatives can help preserve cultural heritage while providing valuable linguistic resources for future generations. Another important area is language education and policy. Linguistic research can contribute significantly to developing effective multilingual education models, particularly in a country like India where students often navigate several languages in their daily lives. Research on mother-tongue education, language acquisition, translation and language assessment can support better teaching practices and help bridge educational inequalities. There is also considerable scope for collaboration between linguists and professionals from psychology, neuroscience, education, computer science and artificial intelligence. Areas such as cognitive linguistics, neurolinguistics, speech recognition, machine translation and language-based AI systems require expertise from multiple disciplines. Such collaboration can create innovative research opportunities and also prepare students for emerging careers in technology, education, translation, publishing and communication. Therefore, the discipline of linguistics needs to move beyond its traditional boundaries and embrace the opportunities created by technology and interdisciplinary research. Universities should strengthen laboratories, digital resources, field-based research and industry collaborations while encouraging students to explore both classical and emerging areas.

NIA Jaipur to be developed as a Global Centre of Excellence in Ayurveda: Union Minister Jadhav

New Delhi, Aug 12 (GNS): The Union Minister of Ayush today chaired the second meeting of the Society of the National Institute of Ayurveda (NIA), Jaipur, in New Delhi. The Deputy Chief Minister and Ayush Minister of Rajasthan, Dr. Premchand Bairwa, along with the Secretary, Ministry of Ayush, Vaidya Rajesh Kotcha, senior officials of the Ministry, and distinguished members of the Society, were present on the occasion. In his address, the Minister stated, “Our vision is to develop the National Institute of Ayurveda as a Global Centre of Excellence that symbolizes advanced research, innovation, quality education, and public health leadership. This Institute must not only achieve excellence but also inspire other Ayurvedic institutions across the country and the world.”

He emphasized that the meeting was not merely an

administrative formality but a platform to chart the Institute's future direction, aligning with the global rise of traditional systems of medicine. The Minister underlined that under the visionary leadership of Prime Minister Shri Narendra Modi, the Ayush sector has made historic progress. The establishment of the WHO Global Centre for Traditional Medicine in India marks global recognition of Indian knowledge systems, embraced with hope and confidence across the world. Achievements of National Institute of Ayurveda (NIA): First Deemed University in the Ayush sector in India. Over 4 lakh OPD patients and 25,000+ IPD patients are treated annually. Free healthcare camps in 12 districts under SC, SR and STP schemes. GMP-certified pharmacy produces more than 100 Ayurvedic medicines. NAAC 'A' Grade, NABH, and NABL accolades

achieved. Students from 15 countries are pursuing education at NIA. Recently declared India's Best Ayurvedic Institution by NCISM.

International collaborations and Guinness World Record achievements, enhancing its global profile.

Commending NIA's performance in education, research, and healthcare services, the Minister emphasized the need for globally benchmarked research, faculty development, modernized curricula, stronger infrastructure, and wider community reach. Reaffirming the government's support, he stated that the Ministry of Ayush stands fully committed to providing all necessary assistance to ensure the Institute continues to elevate the pride of Ayurveda at national and international levels.

The future of linguistics also lies in preserving linguistic diversity while adapting to rapidly chang-

ing patterns of communication. India, with its vast number of languages, dialects and scripts, offers an enormous field for documentation and research. Universities can establish digital archives of endangered languages, oral traditions, folk literature and indigenous knowledge systems. Such initiatives can help preserve cultural heritage while providing valuable linguistic resources for future generations.

Another important area is language education and policy. Linguistic research can contribute significantly to developing effective multilingual education models, particularly in a country like India where students often navigate several languages in their daily lives. Research on mother-tongue education, language acquisition, translation and language assessment can support better teaching practices

and help bridge educational inequalities.

There is also considerable scope for collaboration between linguists and professionals from psychology, neuroscience, education, computer science and artificial intelligence. Areas such as cognitive linguistics, neurolinguistics, speech recognition, machine translation and language-based AI systems require expertise from multiple disciplines. Such collaboration can create innovative research opportunities and also prepare students for emerging careers in technology, education, translation, publishing and communication.

Therefore, the discipline of linguistics needs to move beyond its traditional boundaries and embrace the opportunities created by technology and interdisciplinary research. Universities should strengthen laboratories.

Indian Textile Exports Show Resilience and Growth Despite Mixed Global Trade Sentiments

New Delhi, Aug 12 (GNS): India's textile and apparel sector has continued to demonstrate resilience in July 2025, recording a steady growth trajectory. As per quick estimates released by the Directorate General of Commercial Intelligence & Statistics (DGCIS), exports of major textile commodities in July 2025 reached USD 3.10 billion, marking a 5.37% year-on-year growth compared to USD 2.94 billion in July 2024. For the period April-July 2025, cumulative textile exports stood at USD 12.18 billion, reflecting a growth of 3.87% over the same period last year (USD 11.73 billion).

Readymade Garments (RMG): Exports rose to USD 1.34 billion in July 2025, up from USD 1.28 billion in July 2024 (4.75% growth). Cumulative exports for April-July 2025 stood at USD 5.53 billion, compared to USD 5.13 billion last year (+7.87% growth).

Cotton Textiles (includ-

ing yarn, fabrics, made-ups, and handlooms): Cotton exports reached USD 1.02 billion in July 2025, compared to USD 970.5 million in July 2024 (5.17% growth). Cumulative exports April-July 2025 stood at USD 3.88 billion, nearly unchanged from USD 3.89 billion last year. Man-made Fibre (MMF) Textiles: MMF exports touched USD 422.0 million in July 2025, compared to USD 405.6 million last year (4.05% growth). During April-July 2025, exports amounted to USD 1.59 billion, up from USD 1.57 billion in the same period last year with a growth of 1.13%. Jute Manufacturing (including floor coverings): Jute exports climbed to USD 32.4 million in July 2025, compared to USD 25.6 million in July 2024 (26.35% growth). Cumulative exports stood at USD 126.1 million, up from USD 108.9 million last year (+15.78%).

Carpets: Carpet exports grew to USD 133.0 million

in July 2025, compared to USD 123.1 million last year (+8.05%). Over April-July 2025, exports stood at USD 503.9 million, up from USD 486.5 million registering 3.57% growth.

Handicrafts (excluding handmade carpets): Exports of handicrafts reached USD 153.4 million in July 2025, compared to USD 139.4 million last year (+10.01%). Cumulative exports stood at USD 552.0 million, slightly higher than USD 546.9 million in the same period last year (+0.92%).

Total exports of the six major textile commodity groups crossed USD 3.1 billion in July 2025, showing resilience against mixed global trade conditions. Sustained demand in readymade garments, jute, carpets, and handicrafts contributed significantly to the growth momentum.

The industry's performance highlights India's diversified product strength,

Ministry of Coal to Launch 13th Round of Commercial Coal Mine Auctions

New Delhi, Aug 12 (GNS): The Ministry of Coal is set to launch the 13th round of commercial coal mine auctions on 21st August 2025 in New Delhi. The event will be graced by Union Minister of Coal and Mines, Shri G. Kishan Reddy, as Chief Guest, and Minister of State for Coal and Mines, Shri Satish Chandra Dubey, as Guest of Honour.

This event will mark another significant step towards enhancing transparency, competition, and self-reliance in India's coal sector. The commercial coal mine auction process, which has witnessed robust participation from both established and new industry players in every round, aims to accelerate coal production and ensure adequate supply for the nation's growing energy demand. The upcoming 13th round will continue to offer mines with the most liberal terms, promoting ease of doing business and attracting investments from a diverse set of stakeholders.

Launched in 2020 under the leadership of Prime Minister Shri Narendra Modi, the commercial auction framework has transformed the coal sector by fostering transparency, driving competition, and increasing coal availability for domestic industries, thereby reducing dependence

on imports. The upcoming round will offer a fresh set of coal mines for auction, covering both fully explored and partially explored blocks, attracting diverse participation from experienced miners, new entrants, and technology-driven enterprises. The event will also showcase the potential benefits of underground and surface coal gasification.

The Coal Mine Development & Production Agreements (CMDPA) will be signed for 11 successfully allocated coal mines of previous rounds of Auction.

The Ministry of Coal invites industry leaders, investors, and stakeholders to participate in this significant event and contribute to shaping the future of India's coal sector. As India advances toward its vision of Viksit Bharat, the Ministry of Coal remains dedicated to driving reforms, enhancing ease of doing business, and cultivating a dynamic ecosystem for responsible coal mining.

The 13th round of commercial coal mine auctions is expected to further expand private-sector participation in coal production and strengthen the overall supply chain. The Ministry of Coal has been consistently refining the auction mechanism to make the allocation process more transparent, competitive and investment-friendly.

The upcoming auction will provide opportunities for companies with varied levels of mining experience. Fully explored blocks are expected to attract established mining firms, while partially explored blocks could encourage new players and exploration companies to enter the sector. The broader participation is aimed at unlocking the potential of India's domestic coal reserves.

The Ministry has also been emphasising the adoption of advanced technologies to improve productivity, safety and environmental performance in coal mining. Technology-driven mining practices, better resource utilisation and modern monitoring systems are expected to play an important role in ensuring efficient and responsible extraction.

Special attention is being given to underground coal mining, which can help access resources in areas where conventional surface mining may have limitations. The promotion of underground coal gasification is also expected to open new avenues for utilising coal resources and developing alternative energy applications. The signing of Coal Mine Development & Production Agreements for 11 mines successfully allocated in earlier auction rounds will mark another important milestone.

India, Japan ties to benefit Global South

New Delhi, Aug 12 (GNS): Prime Minister Narendra Modi, in his meeting with his Japanese counterpart Shigeru Ishiba this week, will review the Special Strategic and Global Partnership between India and Japan, including defence and security, trade and economy, technology and innovation, as well as discuss issues of regional and global importance. The visit, which will reaffirm the longstanding special bond of friendship between the two countries, also comes close on the heels of the Africa summit hosted by Japan last week.

Hisar IMC to Attract 32,417 cr Investment, Create 1.25 Lakh Jobs

New Delhi, Aug 12 (GNS): The Amritsar-Kolkata Industrial Corridor (AKIC) initiative achieved an important milestone today with the signing of the State Support Agreement (SSA) and Shareholder Agreement (SHA) between the National Industrial Corridor Development and Implementation Trust (NICDIT), Government of Haryana and Haryana Airports Development Corporation (HADCo).

Under this partnership, the National Industrial Corridor Development Corporation (NICDC) will support the Government of Haryana in developing the Integrated Manufacturing Cluster (IMC) at Hisar. It is one of the 20 projects currently being developed by NICDC in collaboration with State Governments across India.

These agreements reflect the Government of India's strong commitment to support industrial growth and create world-class infrastructure in Haryana, starting with the development of the Integrated Manufacturing Cluster (IMC) Hisar. By strengthening local manufacturing capabilities and encouraging both domestic and international investments, the AKIC will play a key role in advancing the Make in India initiative and helping India become more self-reliant and globally competitive.

Integrated Manufacturing Cluster (IMC) Hisar in Haryana is expected to become a major driver of economic growth in the state. Its development will foster a business-friendly environment, drive large-

scale employment generation, and further strengthen Haryana's position as a leading industrial destination. The cluster is expected to attract significant interest from investors across India and the world, giving a major boost to the country's manufacturing sector. IMC Hisar, spread across 2,988 acres, is being developed under the Amritsar-Kolkata Industrial Corridor near the newly inaugurated Maharaja Agrasen International Airport, Hisar, Haryana. With an investment potential of 32,417 crore and a project cost of 4,680 crore, it is expected to generate 1.25 lakh jobs. Strategically located between the EDFC and WDFC, it offers excellent connectivity via NH-52, NH-09, rail links, and proximity to major logistics hubs.

With advanced infrastructure and proximity to Hisar city, this IMC is set to become an important part of Haryana and North India's industrial future.

The agreements were signed by Chief Executive Officer and Managing Director, NICDC, Shri Rajat Kumar Saini; Commissioner and Secretary to the Government of Haryana, Civil Aviation Department, Smt. Amneet P. Kumar; and Managing Director, HADCo, Government of Haryana, Shri Narhari Singh Banger. This futuristic collaboration sets the foundation for the development of these industrial clusters which will serve as strategic hubs under the Amritsar-Kolkata Industrial Corridor and contribute to India's vision of becoming a leading global manufacturing hub.

DAHD's Virtual Program Engages 1 Lakh+ Farmers on Livestock Productivity

New Delhi, Aug 12 (GNS): The Department of Animal Husbandry and Dairying (DAHD), under the Ministry of Fisheries, Animal Husbandry and Dairying, organized a “Virtual Awareness Program for Enhancing Livestock Productivity” today. 1 Lakh + livestock farmers, from 2000 Common Service Centers (CSCs) across India namely from states/UTs : Chhattisgarh, Jharkhand, Madhya Pradesh, West Bengal, Orissa, Kerala, Andaman & Nicobar Island, Lakshadweep, Delhi and Chandigarh joined this session. The meeting was chaired by Union Minister of State, Ministry of Fisheries, Animal Husbandry and Dairying and Ministry of Panchayati Raj Prof. S.P. Singh Baghel from New Delhi. Ms. Varsha Joshi, Additional Secretary (DAHD), Shri. Rama Shankar Sinha, Additional Sec-

retary (DAHD) along with the other senior officials of the department were also present on this occasion. In his address, Prof. S.P. Singh Baghel, highlighted the invaluable contributions of the livestock farmers in boosting the national economy. He stated that milk production in the country has grown at the rate of 5.7 % per annum, during the past 10 years while the world milk production growth rate is only 2% per annum. Prof. Baghel commended the livestock farmers for this achievement. He also appreciated the departmental initiatives like the vaccination programs, use of Sex-Sorted Semen (SSS) etc that has helped in increasing animal productivity in the country. He interacted with the farmers and enquired about the on-ground availability of veterinary services like utilization of toll-free

number 1962 for treatment related assistance. The Union Minister of State laid emphasis on the need to opt for animal insurance and stressed on the importance of getting the animals vaccinated as per schedule.

The program was aimed at creating awareness among farmers on critical aspects of animal husbandry, including breed improvement, zoonotic disease control, biosecurity, and entrepreneurship development through departmental schemes. It featured awareness videos and expert sessions on various topics to enhance livestock productivity. The session also served as a platform for knowledge exchange, policy awareness, and entrepreneurial inspiration, reinforcing the role of livestock farmers as key contributors to rural development and economic growth.

Centre cuts wheat stock limit for traders to keep prices in check

New Delhi, Aug 12 (GNS): As part of continuous efforts to moderate prices of wheat before the upcoming festive season, the Central Government has decided to reduce the wheat stock limit applicable to wholesale and retail traders as well as processors in all States and Union Territories until March 31, 2026.

The stock limit of wheat for wholesalers has been reduced to 2,000 metric tonnes (MT) from 3,000 MT earlier, while in the case of retailers, the stock limit has been cut to 8 MT for each retail outlet from 10 MT earlier, according to a statement issued by the Ministry of Consumer Affairs, Food and Public Distribution.

Similarly, for wheat processors, the wheat stock limit has been scaled down to 60 per cent of the monthly installed capacity (MIC) multiplied by the remaining months of FY

2025-26. Earlier, the limit was fixed at 70 per cent of the monthly installed capacity multiplied by the remaining months of FY 2025-26. The stock limits are imposed as part of the government's policy to manage overall food security and to prevent hoarding and unscrupulous speculation that drives up prices by creating an artificial scarcity.

All wheat stocking entities are required to declare/update the stock position on every Friday on the wheat stock portal (<https://foodstock.dfpd.gov.in>). Any entity which is found not to have registered on the portal or violates the stock limits will be subject to suitable punitive action under Sections 6 and 7 of the Essential Commodities Act, 1955. In case the stocks held by these entities are higher than the prescribed limit, they will have to bring them down to the pre-

scribed stock limits within 15 days of the issue of the notification. Officials of the Central and State Governments will be closely monitoring the enforcement of these stock limits to ensure that no artificial scarcity of wheat is created in the country.

A total production of 1175.07 lakh metric tonnes (LMT) of wheat was recorded during the crop year 2024-25, and there is ample availability of wheat in the country. The Central Government has procured 300.35 LMT wheat in the Rabi marketing season for 2025-26 through state agencies and the FCI, which is sufficient to meet the requirements of PDS and other market interventions. The Department of Food and Public Distribution is maintaining a close watch over the stock position of wheat to control prices and ensure easy availability in the country, the statement added.

CM Revanth Reddy orders recovery of full grain arrears from millers

Hyderabad, Aug 12 (GNS) Telangana Chief Minister A Revanth Reddy on Wednesday directed officials to ensure recovery of the full value of grain arrears owed by millers and instructed them to formulate specific guidelines for the recovery process. Revanth Reddy, accompanied by Civil Supplies Minister Uttam Kumar Reddy, reviewed the functioning of the Civil Supplies Department at MCRHRD here. He said the government would adopt a cooperative approach towards genuine millers but warned of strict action against those deliberately evading payments, an official statement said.

The Chief Minister alleged that the previous government had allowed

grain arrears worth thousands of crores of rupees to accumulate and was now attempting to blame the current government. He noted that some progress had been made in recovering the dues but stressed that the value of every grain should be recovered.

He directed officials to submit the proposed re-

covery guidelines to the Cabinet Sub-Committee for consideration and said the government would take an appropriate decision based on its recommendations. Paddy earlier allotted to chronic defaulters would instead be given to women's self-help groups, with milling entrusted to them, he said.

To address recurring paddy storage problems, Revanth Reddy ordered a pilot project for silo bag facilities in high-paddy-arrival districts including Nalgonda, Suryapet, Nizamabad, Peddapalli and Kamareddy. He proposed allocating 50 to 100 acres per constituency for the facilities, to be man-

aged by Self-Help Groups. The Chief Minister also directed officials to explore grain storage on spacious platforms at VBZ Ramji using German tents and to identify and lease private warehouses, function halls, old cinema theatres and other available sheds at mandal and village levels in advance.

Telangana to Distribute 1.19 Lakh Sewing Machines to BC Women

Hyderabad, Aug 11 (GNS) The Telangana government will launch a scheme to distribute 1.19 lakh automatic sewing machines to poor and unemployed Backward Class (BC) women across the state, with the machines being provided under 100 per cent government subsidy. Minister for Transport and BC Welfare Ponnam Prabhakar will formally launch the scheme at the Dr B.R. Ambedkar Secretariat here on Thursday, August 13, at noon. Under the scheme, 1,000 automatic sewing machines will be distributed in each of the state's 119 Assembly constituencies, benefiting a total of 1,19,000 BC women.

The initiative aims to create self-employment opportunities for women who

possess tailoring skills and enable them to earn an income from home. The government said the scheme is intended to help improve the financial condition of beneficiaries and their families and promote women entrepreneurs.

The machines will be provided entirely through government subsidy, with no financial burden on the beneficiaries. Minister Ponnam Prabhakar is expected to announce the detailed scheme guidelines, budget allocation, beneficiary selection criteria, eligibility conditions and application process at the launch event.

BC Ministers, MPs, MLAs, MLCs and BC Corporation chairpersons are scheduled to participate in the programme.

Sridhar Babu accuses KTR of misleading people over land allocations

Hyderabad, Aug 11 (GNS) Telangana Agriculture Minister Tummala Nageswara Rao directed officials to ensure smooth and transparent procurement of cotton during the 2026-27 season and prevent any inconvenience to farmers. Reviewing procurement arrangements with Cotton Corporation of India (CCI) officials in Hyderabad, the Minister said farmers must receive the Minimum Support Price (MSP) and there should be no interference by middlemen.

He urged Central and State officials to coordinate closely and prevent irregularities reported during previous seasons. Cotton cultivation in Telangana is expected to cover 46.33 lakh acres, with an estimat-

ed production of 25.85 lakh metric tonnes. The MSP for Long Staple Cotton has been fixed at Rs 8,667 per quintal, an increase of Rs 557 over the previous year.

Tummala directed officials to notify all 356 ginning mills and ensure their availability based on demand. He said the number of CCI procurement centres had been increased from 122 to 131 and

called for additional centres wherever necessary to handle heavy arrivals. He also ordered effective monitoring of procurement centres, functioning of quality-testing equipment and CCTV cameras, regular inspection of weighing machines, and prompt resolution of farmers' grievances.

District-level committees under Collectors should include farmers' representatives, he said. The Minister stressed the need for wide publicity on MSP, procurement centres and slot booking through the 'Kapas Kisan' app. He also directed officials to publicise the farmer helpline 1800 599 5779 and WhatsApp chatbot 88972 81111, according to an official statement on Tuesday.

Azharuddin Reviews CM's Minority Students Felicitation

Hyderabad, Aug 12 (GNS) Hon'ble Minister for Minorities Welfare & Public Enterprises Sri Mohammed Azharuddin convened a high-level review meeting at the Telangana Secretariat on Wednesday to review the arrangements for the Hon'ble Chief Minister Sri A. Revanth Reddy's felicitation programme scheduled to be held on August 13. The programme will felicitate meritorious students from minority communities who have excelled in Group-I, Group-II, IIT-JEE, EAPCET and other competitive examinations, along with toppers of the Telangana Minorities Residential Educational Institutions Society (TGMREIS) in SSC and Intermediate examinations.

During the meeting, Minister Mohammed Azharuddin reviewed the arrangements with senior officials and directed the concerned departments to ensure that the programme is conducted smoothly, systematically and with all necessary facil-

ities for the students, their families and guests.

The Minister stressed the importance of recognising and encouraging academic excellence among minority students, stating that the achievements of the toppers would inspire more young people to pursue higher education and competitive examinations with confidence. He further emphasised the need for close coordination among all concerned departments to ensure proper security, traffic management, sanitation, medical assistance, fire safety, civic amenities and other logistical arrangements for the successful conduct of the programme.

Hon'ble Advisor to the Telangana Government Sri Mohammed Ali Shabbir, TGMREIS President Sri Faheem Qureshi, Minorities Welfare Department Secretary Sri B. Shafiullah, IFS, Principal Secretary Sri Ahmed Nadeem, and other senior officials participated in the review meeting.

List of Participants / Departments 1. District Collector, Hyderabad 2. Commissioner of Police, Hyderabad 3. Additional Commissioner of Police, Traffic 4. Commissioner, GHMC5. Director General, Telangana State Disaster Response and Fire Services, Hyderabad 6. Commissioner, Horticulture 7. Commissioner, I&PR 8. Chief Engineer & Managing Director, Transco 9. Managing Director, HMWSSB 10. District Medical & Health Officer (DMHO), Hyderabad The participation of senior officials from various departments underlines the Telangana Government's commitment to ensuring comprehensive arrangements and successful coordination for the felicitation programme. The Minorities Welfare Department is taking all necessary steps to make the event a meaningful celebration of the academic achievements, talent and aspirations of minority students.

MP Arvind Seeks Stronger Disability Welfare Support

Falaknuma News
State Correspondent
M.A.Samad
New Delhi, Aug 12:

Nizamabad MP Dharmapuri Arvind met Union Minister for Social Justice and Empowerment Dr. Virendra Kumar in New Delhi and discussed measures to further strengthen welfare and empowerment initiatives for persons with disabilities in the constituency.

MP Arvind apprised the Union Minister of the difficulties faced by persons with disabilities and requested effective measures to ensure better access to welfare schemes, assistive devices and government services.

He sought wider coverage of assessment camps for providing wheelchairs, hearing aids and artificial limbs to eligible beneficiaries. He also urged the Centre to enhance opportunities for persons with disabilities in education, employment and skill development.

The MP emphasised the need to improve accessibility and barrier-free facilities in government offices, educational institutions and public places, enabling persons with disabilities to access services inde-

pendently and with dignity.

MP Arvind stated that efforts were being made in the constituency to ensure that the benefits of Central Government welfare schemes reach all eligible persons. He thanked the Union Minister for his support and cooperation.

Dr. Virendra Kumar responded positively to the issues raised by the MP and assured that the Union Government would extend all necessary assistance for the welfare, empowerment and overall development of persons with disabilities.

MLA Dhanpal Distributes National Flags in Nizamabad

Falaknuma News
State Correspondent
M.A.Samad

Nizamabad Aug 12 Nizamabad Urban MLA Dhanpal Suryanarayana Gupta called upon people to hoist the Tricolour at their homes and make the Har Ghar Tiranga campaign a grand success. As part of the campaign, the MLA distributed National Flags to the public at Gandhi Chowk in Nizamabad on Wednesday.

Speaking on the occasion, Dhanpal said Prime Minister Narendra Modi launched the Har Ghar Tiranga campaign in 2022 as part of

the Azadi Ka Amrit Mahotsav, commemorating 75 years of India's Independence. He said the initiative was aimed at encouraging citizens to dis-

play the National Flag at their homes and strengthening patriotism and the people's emotional connection with the Tricolour. He recalled that

a Har Ghar Tiranga bike rally was organised in New Delhi on August 3, 2022, from the Red Fort to India Gate under the leadership of then Vice-President M. Venkaiah Naidu.

The MLA appealed to citizens to participate in the campaign with patriotic spirit and hoist the National Flag respectfully at every home. Nagolla Lakshminarayana, Bellal Shashank, Yrram Sudheer, Bantu Ramu, Bantu Preethi, Shyamala, Malkai Mahender, Sunitha Raju, Bobbili Suvarna Venu, Vaishnavi Sudha, Ippakayala Sumitra Kishore, Jyothi Murali and other Morcha leaders were present.

India ranks first globally in digital transactions: BJP chief

Hyderabad, Aug 12 (GNS) BJP Telangana State president N Ramchander Rao on Wednesday said India had made significant progress since Independence, particularly in digital technology, innovation and attracting investments.

Speaking as chief guest at a Science Fund programme organised by SVP here, Rao stressed the need for greater financial support to scientific research and innovation, particularly from private sector partners.

He said increased funding for science and technology would encourage new innovations, help

startups and MSMEs grow faster and strengthen the country's economy. Rao said India was now the world's fourth-fastest-growing major economy and described its leadership in digital payments as a matter of pride.

He said India's UPI system accounted for around 40 per cent of global digital transactions, reflecting the strength of the country's technology sector.

He appreciated organisations such as SVP for supporting new innovators and startups through funding and expressed hope that such initiatives would contribute to India's economic growth.
