

India all set for BRICS Summit: PM Modi

New Delhi, Sep 10 (GNS): As New Delhi gears up to host the two-day BRICS Summit over the weekend, Prime Minister Narendra Modi said on Thursday that India is gearing up for the high-profile event. PM Modi shared a video on X, showing Bharat Mandapam – the venue of the BRICS Summit – all decked up to welcome world leaders.

The video ended with a text that read, “India is gearing up for BRICS 2026”. As BRICS chair 2026, India will host the 18th BRICS Summit in New Delhi on September 12-13, bringing together leaders of BRICS Member and Partner Countries as well as Outreach Invitees. While sharing the video on X, PM Modi wrote, “All set for BRICS 2026!” Russian President Vladimir Putin, Chinese President Xi Jinping, South African President Cyril Ramaphosa, United Nations Secretary-General Antonio Guterres, Iranian President Masoud Pezeshkian and several other leaders will visit the Indian capital to attend the summit.

India’s BRICS chairship is guided by the theme: ‘Building for Resilience, Innovation, Cooperation and Sustainability’, reflecting PM Modi’s vision of a people-centric approach rooted

in the spirit of “Humanity First.” In addition to these areas, the leaders will exchange views on strengthening intra-BRICS cooperation on common priorities and share perspectives on global and regional matters of mutual importance.

BRICS comprises Brazil, China, Egypt, Ethiopia, India, Indonesia, Iran, Russia, Saudi Arabia, South Africa, United Arab Emirates. BRICS partner countries are: Belarus, Cuba, Bolivia, Kazakhstan, Malaysia, Nigeria, Thailand, Uganda, Uzbekistan and Vietnam. India is a founding member of BRICS, and has previously held its chairship in 2012, 2016 and 2021.

India assumed its fourth BRICS chairship on January 1. The year 2026 also marks a significant milestone as BRICS completes 20 years since its establishment. Ahead of the BRICS Summit, the Delhi Police, in coordination with multiple agencies, have made elaborate security arrangements, including the deployment of 15,000 police personnel and 200 companies of paramilitary forces.

Police have also issued advisories for the general public about the routes that will be “restricted” for VVIP movement in view of the upcoming event.

CM Revanth urges Congress legislators to counter ‘BRS conspiracy’

Hyderabad, Sep 10 (GNS): Telangana Chief Minister A. Revanth Reddy on Thursday asked Congress legislators to strongly counter what he called the conspiracy of the opposition BRS to disrupt the smooth functioning of the State Legislature.

Addressing a Congress Legislature Party (CLP) meeting, he alleged that the Bharat Rashtra Samithi (BRS) hatched the conspiracy at the farmhouse of its leader and former Chief Minister K. Chandrasekhar Rao. He urged the Congress MLA and MLCs to strongly counter the opposition’s conspiracy and expose their plot against the government before the public.

CM Revanth Reddy said even after losing power, the BRS leaders refused to shed their arrogance; they verbally abused police officers

and public representatives and disrupted the proceedings of the House for three days. They behaved inappropriately towards officials and caused embarrassment by taking off their T-shirts in the presence of female officers. They used highly objectionable language to abuse the Speaker of the Legislative Assembly, he said. He alleged that when the SC Cell organised a protest programme, they insulted the Dalit community by ritually “purifying”

the ground where Dalits had walked. The Chief Minister said an inquiry has already been initiated into the incidents that took place at the Assembly gate on September 7.

Both the former ministers are presently with the BRS, and they were allegedly manhandled during the September 7 incident.

He urged the Congress legislators to explain to the public the decisions taken and the development and welfare programmes im-

plemented by the Congress government during the last 1,000 days. He thanked the legislators for their cooperation during these 1,000 days of governance.

He told them that with their support, the government implemented initiatives not seen elsewhere in the country. The CM told the Congress legislators to participate in the discussions in the Assembly. Care must be taken to ensure that attendance in the House does not drop.

“If you do not make proper use of the mandate given by the people, you will not be able to succeed politically in the future,” he said and urged them to raise issues concerning their respective constituencies. Revanth Reddy also remarked that those who rose through the Congress party were now seeking to cause harm to the party. “If the Congress party had not provided the opportunity, would Sunitha Laxma Reddy and Sabitha Indra

Reddy have risen to become state-level leaders otherwise?” he asked.

Referring to the caste census conducted in Telangana, he said that it serves as a role model for the country. “This is an achievement of the Telangana state. We must pressure the Centre to adopt the Telangana model and conduct a caste census alongside the general census,” he said.

The CM alleged that there is a conspiracy to delete votes under the guise of Special Intensive Revision (SIR). CM Revanth Reddy said the country’s adult population is estimated at 103 crore, but the voter list shows only 88 crore. He claimed that 15 crore votes have gone missing across the country and remarked that there is a danger lurking somewhere.

Prince Rahim Aga Khan V Calls On President Droupadi Murmu

New Delhi, Sept 10 (GNS): Prince Rahim Aga Khan V, the 50th hereditary Imam (spiritual leader) of the Shia Ismaili Muslims and Chair of the Aga Khan Development Network, called on President Droupadi Murmu at Rashtrapati Bhavan on Thursday. During their discussions, President Murmu appreciated the work undertaken by the Aga Khan Development Network.

“His Highness Prince Rahim Aga Khan V called on President Droupadi Murmu at Rashtrapati Bhavan. The President appreciated the work undertaken by the Aga Khan Development Network and said it demonstrates how non-profit organisations, working in partnership with the government, can improve

people’s quality of life,” the President’s Secretariat stated on X. Earlier in the day, Vice President C P Radhakrishnan held a meeting with Aga Khan, with discussions held on further strengthening cooperation between India and the Aga Khan Development Network in several sectors, including sports and educa-

tion. During the meeting, the two leaders reaffirmed the need to eradicate radicalisation and emphasised that dialogue remains the path to peace, stability and shared prosperity.

“H.H. Prince Rahim Aga Khan V met Hon’ble Vice-President of India Shri C P Radhakrishnan at Uprashtrapati Bhavan today.

India, Armenia Continue To Strengthen Military-To-Military Engagements

New Delhi, Sept 10 (GNS): A five-member delegation of the Armenian Armed Forces, led by Major General Alexander Tsakanyan, visited an Indian Air Force (IAF) station under Western Air Command and undertook a guided tour of operational and maintenance facilities.

“Strengthening India-Armenia Defence Cooperation: A five-member delegation of the Armenian Armed Forces, led by Maj Gen Alexander Tsakanyan, visited an Indian Air Force station under Western Air Command. The delegation undertook a guided tour of operational and maintenance facilities,” the IAF stated on X.

“The visit strengthened military-to-military

engagement. It fostered mutual understanding, knowledge sharing and operational interoperability. It also reaffirmed the enduring defence ties between India and Armenia,” it added.

As Armenia seeks to diversify its defence procurement, India has emerged as its major partner in mili-

tary technical cooperation with both countries sharing similar views on multilateralism and strategic autonomy, the Ministry of Defence stated last month, highlighting Defence Secretary Rajesh Kumar Singh’s ‘fruitful’ discussions with Deputy Foreign Minister of Armenia, Mnatsakan Saffarian, in Yerevan.

India’s Election System Follows Constitution, Laws Strictly: CEC Gyanesh Kumar

Ahmedabad, Sep 10 (GNS): India’s electoral process is conducted with strict adherence to the Constitution, election laws and instructions of the Election Commission of India (ECI), Chief Election Commissioner Gyanesh Kumar said on Thursday, describing the system as a vast and transparent mechanism that sustains the world’s largest democracy. He was speaking at a special interaction with enlightened citizens on ‘Conducting Elections in India – The Largest Democracy in the World’ organised at the Ahmedabad Management Association (AMA).

Explaining the scale of the electoral exercise, CEC Kumar said India has around 90 crore voters and that conducting Lok Sabha elections is the world’s

largest electoral process. “Around 1.8 crore personnel are engaged in election duties during a general election, and managing such a large electorate and workforce reflects the distinctive capacity of India’s election system,” he emphasised.

CEC Kumar said the three principal stages of the electoral process are preparation of electoral rolls, polling and counting. “Around 12 lakh Booth Level Officers

(BLOs) verify electoral rolls by visiting voters’ homes. Continuous verification is carried out to ensure that eligible voters are included while ineligible names are removed,” he added.

He stressed that the basic objective of the electoral system is to ensure that every eligible person becomes a voter and that no ineligible person is included in the electoral roll.

The Chief Election Commissioner also highlighted the participation of political parties and candidates at different stages of the process. “Booth Level Agents participate in the verification of electoral rolls, while mock polls are conducted on Electronic Voting Machines (EVMs) before actual polling begins,” he said.

SC Collegium recommends appointments to Karnataka, Delhi, J&K & Ladakh, Jharkhand HCs

New Delhi: The Supreme Court Collegium, headed by Chief Justice of India (CJI) Surya Kant, on Thursday recommended a fresh set of appointments to the Delhi, Karnataka, Jammu & Kashmir and Ladakh, and Jharkhand High Courts.

The apex court Collegium has approved the proposal for appointment of judicial officers Usharani, K.S. Bharath Kumar and Neral Veerabhadraiah Bhavani as Judges of the Karnataka High Court.

In its meeting held on Thursday, the SC Collegium also recommended the names of eight judicial officers for appointment as Judges of the Delhi High Court. The recommended judicial officers are Gurvinder Pal Singh, Nivedita Anil Sharma, Nisha Sahay Saxe-

na, Sanjay Sharma-I, Bharat Parashar, Dr. (Smt.) Aditi Choudhary, Dinesh Bhatt, and Arun Bhardwaj.

“The Supreme Court Collegium, in its meeting held on 10th September, 2026 has approved the proposal for appointment of the following Judicial Officers as Judges of the High Court of Delhi,” said a statement uploaded on the website of the apex court.

Further, the SC Collegium approved the proposal for appointment of judicial officer Yash Paul Bourney as a Judge of the High Court of Jammu & Kashmir and Ladakh.

It also recommended the appointment of judicial officers Manoj Prasad, Akhil Kumar, and Ram Sharma as Judges of the Jharkhand High Court.

As per the Memorandum of Procedure (MoP) governing the appointment of High Court judges, the proposal for appointment is initiated by the Chief Justice of the High Court concerned in consultation with the two senior-most judges of that High Court. The recommendation is forwarded by the Chief Justice to the Chief Minister, who transmits it to the Governor.

US Proposes End To H-1B Job-Loss Grace

Washington: The Trump administration has proposed ending the up-to-60-day grace period that allows H-1B workers and several other employment-based visa holders to remain in the United States after losing their jobs, a move that could sharply narrow the time available to find a new employer or pursue another immigration option.

The Department of Homeland Security (DHS) proposal, scheduled for publication in the Federal Register on Friday, would remove the provision at 8 CFR 214.1(l)(2), which covers E-1, E-2, E-3, H-1B, H-1B1, L-1, O-1 and TN visa classifications and their dependents.

If finalised, workers whose employment or qualifying activity ends would generally have to leave the United

States immediately, unless they are otherwise authorised to remain.

DHS said the present grace period “disconnects the alien’s lawful status from the very basis of eligibility” for these employment-based non-immigrant classifications.

The proposal would restore what DHS described as its earlier policy, under which a worker was expected to depart once employment with the sponsoring employer ended.

Under the current rule, eligible workers and their dependents may remain for up to 60 days, or until the end of their authorised validity period if that comes earlier, without being treated as out of status because of the end of employment. The period is discretionary and can be

Faster economic growth, deeper reforms are the way forward for India

CHANDNI S CHANDEL

Some commentators suggest that the economy may at long last be on a higher growth track. This is because growth in the last five financial years (2021-26), taking into account the advance estimates for the current fiscal year, averages a handsome 8.1 per cent — the best on record. However, there hasn't been enough of a structural change in the economy since the launch of reforms in 1991. Much work remains to be done before the economy can gain significant momentum, writes senior journalist TN Ninan in his Edit article The longer road to faster growth. Key macro numbers suggest caution. Many sectors have benefited from reform, like real estate; and manufacturing may at last be getting some momentum, led by the electronics sector, he writes. A productivity uptick depends critically on three structural changes that are yet to happen: A substantially bigger manufacturing sector, greater formalisation of the economy and rapid urbanisation. There is as yet not enough evidence of any of the three, he opines.

Meanwhile, talking about the preparations going on for presenting the 2026-27 Budget, our economy needs to grow faster in order to escape the middle-income trap, writes senior financial journalist Sushma Ramachandran in her Edit article

Budget must spur all-out reforms. Though the restructuring and recalibration of the GST has been a game-changer for the economy, manufacturing has not yet expanded sufficiently to absorb unskilled or skilled personnel. The Budget should be used as an opportunity to bring about greater ease of doing business in the economy, she writes.

Talking of the global headwinds, widespread demonstrations and rioting have shaken Iran. The ongoing demonstrations appear to represent an existential crisis for the Islamic Republic of Iran. Calls for regime change may be premature, but change within the regime is on the cards, writes former Ambassador to Iran Gaddam Dharmendra in his Edit piece Turmoil puts Iran at a crossroads. The pattern of past protests in Iran, most recently the 2022 anti-hi-

jab demonstrations, is that popular discontent is initially fuelled by either a social (anti-hijab) or economic grievance and thereafter it rapidly transforms into a political uprising. The current demonstrations are following a similar pattern. However, this time around, the diversity of protesters have shifted into a higher gear with an intensity never seen before.

Talking of something altogether different, Editor-in-Chief Jyoti Malhotra in her weekly column The Great Game Modi govt's cultural ambition writes there's something about a museum that appeals to the Modi government. The first gallery of what's expected to be the world's largest museum, the Yuge Yugeen Bharat, will open by the end of the year. From the Pradhan Mantri Sangrahalaya, to a museum of Indian temple architecture being

built in the shadow of the Ram Mandir, the RSS and the BJP are keen to carve out a special memory in the heart of India, she avers. Modi understands that you may hate them or love them, but monuments are always going to stand the test of time. And that's why, New Delhi has been slowly rebuilt and reshaped in the last 11 years since Modi became PM, she writes.

Denial of bail to Umar Khalid and Sharjeel Imam in the 2020 riots conspiracy case continues to be the topic of discussion and debate, with the Supreme Court holding that they were not entitled to bail effectively for another year. If a trial is delayed without any valid justification, the accused should be granted bail, writes former SC Judge Justice Madan B Lokur (ret'd) in his Edit Speedy trial is Umar-Sharjeel's right. The apex court noted that

it did not want to apportion blame for the delay in framing charges either on the prosecution or the accused persons. But the cause of delay ought to have been apportioned, he writes. Should Umar and Sharjeel be deprived of their personal liberty due to a somnambulant prosecution and a meandering case? Surely, this was a case that should have been decided within six months and not one where documents were supplied to the accused after three years, he avers.

The Enforcement Directorate conducted raids, part of a money laundering investigation into an alleged multi-crore coal theft scam in Bengal, on the political consultancy firm I-PAC, also the election consultant of Mamata Banerjee's Trinamool Congress. And the West Bengal Chief Minister Mamata Banerjee seized the initiative, took to the roads in the form of a rally. She turned the incident it into a springboard for political retaliation, writes senior journalist Shikha Mukerjee in her Op-Ed How Mamata turned the ED raid into a rally. While the raids and their timing, months away from the crucial West Bengal Assembly elections, fits the pattern of similar raids on people and organisations, the speed and Mamata's extravagant response are a measure of how she understood the effect of the action, she writes.

Iran in the eye of the storm

K N PANDITA

A report from a knowledgeable source says that more than 2,000 Iranian protesters, mostly the youth, have been killed in the ongoing anti-regime protests, and almost 12,000 demonstrators have been rounded up. Anti-regime demonstrations have spread to almost all the 31 provinces of the country. Reportedly, no fewer than a hundred mosques have been vandalised. In the holy city of Mashhad, some mosques have been set ablaze, and many clerics are reported to have left the city for a safer but unknown place. The shopkeepers in the main market of Tehran have pulled down the shutters of their shops, and all business has come to a standstill.

The 86-year-old Supreme religious leader repeatedly says that the agitation is urged on jointly by the US and Israel. He repeats that if the US attacks Iran with the intention of changing the regime, Iran will react by attacking American interests all over the globe. The two sides are exchanging threats in a heightened tone. The Iranian theocracy has to project an enemy to neutralise the fervour of protesters. The US and Israel come in handy. President Trump has repeated his warning that the US will strike if the theocratic regime in Tehran deploys its army to shoot the protesters. The shooting in Tehran and other towns in Iran has been going on since January 5, and if the grapevine is to be believed, more people have been killed in

Iran in just two or three days than the numbers killed in the Ukraine war in 2 years, which is computed at 24,000.

Trump's threats appear hollow and may even prove counterproductive. During its tenure of nearly four and a half decades, the theocratic regime has succeeded in profiling the US as Iran's number one enemy (the "Great Satan") among ordinary Iranians. Trump needs to understand that Iran is not Venezuela. Ancient civilizations have a personality. Ali Khamenei cannot be taken to Washington in handcuffs. Amusingly, a White House Press staffer says that Iran is sending messages to White House which are different from what they say on social media. Observers suspect talks behind the curtain are going on between Tehran and Washington.

At the same time, the regime could muster strength and collect a crowd of about a hundred thousand people in Tehran to raise slogans in its support. The regime quickly hyped the news. If it is true, then Iran is heading

towards a civil war because, owing to the non-availability of a single channelising force among the protesters, the regime can drag on the fight back. Reza Pahlavi, the crown prince, based in the West, has issued a couple of directives to the masses of Iranian people asking them to pour out on the streets in millions by way of a big show against the theocratic regime. Should he have chosen a more subtle and diplomatic stance in reaching the protesting masses or not is what history will tell him. But to presume him the showpiece in the ongoing turmoil is not yet substantiated by the ground situation.

The British press has been taking a very cautious note of the situation unfolding in Iran. So far, there is nothing in the British media that reflects its support for a democratic, non-religious movement. The Western press has been highlighting the collapsing economy as the only reason for a huge stir among the people of Iran. The near-collapsed economy is a reality, but neither the real

nor the only cause of an agitation of huge magnitude against the regime.

The reality about Iran is that although it has done much service to embellish Islam, in cultural terms, its people never became truly Islamic. Iranians usually think highly of their pre-Islamic civilisation and traditions. In other words, the civilisation of the Arabs could not make real space or accommodation in the cultural periscope of the people of Aryan stock. This is true not only of Iran but also of the entire belt of the Asian lands that had become home to the Aryan race after its dislocation from the vast Steppes of Central Asia, to which Iran, Tajikistan, Afghanistan and vast segments of the sub-Himalayan or North Indian region should also be added.

The history of Iran (to be precise, of Khorasan), Afghanistan, Northern India, the sub-Himalayan viz., Karakorum (literally meaning the lands to the East of Iran), Hindu Kush and Badkhashan regions, all have

often revolted against the domination of Arab civilisation. Their resentment has been active as well as passive, depending on the ground situation. In Iran, revolts against Arab domination began from very early times. Most of these revolts were suppressed by the regimes using muscle power and support from local petty satraps. On an ideological level, the confrontation between liberals and conservatives has a long history, beginning in early times and running down to the present day. From the very beginning of the Caliphate, Islam was treated as a dichotomy, which took the shape of 'good Musulman and bad Musulman' in our times.

The priestly class has always been influential in Iranian society. They have inherited the influence and not won it through their merit. The Shia religious hierarchy is close to the Zoroastrian religious hierarchy that had been in vogue in Iran for nearly four hundred years prior to the advent of Arabian culture.

'Homeland or Demographic Balance' is the solution

On this day 19 January, thirty six years ago in 1990, the indigenous people of Kashmir -the Kashmiri Pandits faced their worst in their valley where they had been living for the last ten thousand years. They have a written history of more than five thousand years in Kashmir. This was not the first time that they faced the slogans of "Raliv-Galiv-Chaliv" (convert-get killed-flee) openly and publicly. It happened earlier also during the despotic rule of Sultans, Cheks, Mughals, Pathans and even in 1931 and 1947. However, this time it happened despite the existence of the constitution, democratically elected governments, rule of law and universal human rights & the fundamental rights which include the right to life.

After experiencing genocide and forced mass-exodus from Kashmir in 1989-90, the displaced community of Kashmiri Pandits decided to organise a convention in Jammu to build a response to their ethnic cleansing and displacement. It was a tall order to think in terms of an appropriate response to the situation that the exiled community was put to in their own country. In the climatic intense heat of July 1990 coupled with the heat of having been forcibly thrown on the streets by the Islamic fundamentalists and terrorists in connivance with the political organisations in the valley, the displaced community of Kashmiri Pandits organised a two-day conference on 13-14 July 1990 in Jammu named 'Kashmiri Hindu Convention-1990'. City & Local Guides

The convention was attended by around 500 delegates of the community who adopted a number of resolutions in the conclave. The most important resolution passed unanimously was called 'Resolution no. 4' and it gave a call for the creation of a security zone in the valley of Kashmir with constitutional guarantees for the Hindu community of Kashmir. This convention was held under the banner of All State Kashmiri Pandit Conference (ASKPC) -the oldest socio-political representative body of the Kashmiri Pandits headquartered at historic Sheetalnath in Srinagar-Kashmir. With this Convention and Resolution number 4, the struggle for the socio-cultural-political existence of the displaced community began.

After a marathon public contact drive immediately after the convention, the key youth activists of the displaced community including this author formed a public platform to pursue the cause of the Resolution number 4. It consequently resulted in the formation of Panun Kashmir on 31st December 1990. Panun Kashmir became the biggest rallying factor for the displaced community and accordingly a big conclave was organized on 27-28 December, 1991 which was attended by the community activists from all over the world. The 1,000 delegates' conclave named 'Margdarshan-1991' adopted the Homeland Resolution on 28 December 1991. The resolution achieved historical importance in the socio-political struggle of the Kashmiri Pandit community post exodus from the valley and it caught the imagination of the people at large.

The Margdarshan homeland resolution has three parts viz the context, the declaration and the operative part of the resolution. In the operative part, the resolution demands that keeping in view the context and the declarations in the resolution, a separate homeland for the Hindus of Kashmir be established on the north and east of river Vitasta (Jehlum) in Kashmir where Kashmiri Hindus yearning to return and live in the valley be resettled. The homeland should be declared a Union Territory and in this territory, the Indian constitution should have a full flow in letter and spirit. It meant that the historic resolution wanted reorganisation of the state of Jammu and Kashmir along with the nullification of the Article 370 and 35A, separate constitution, flag and emblem of Jammu and Kashmir along with any sort of special status to Jammu and Kashmir state.

This resolution received great support from the people across the displaced community; and conferences after conferences held during the 1990s in various parts of the country endorsed and reiterated the demand made in the historic resolution. On 13 July 2000, all frontal organisations of the Kashmiri Pandit community held a 'Kashmiri Pandit Representative Assembly' in Jammu and in the spirit of the Margdarshan resolution demanded a separate state for the Hindus of Kashmir in the Kashmir valley. Thereafter, the Kashmir Displaced District unit of the BJP in 2013 adopted a resolution in a conference held at Jammu in which it demanded a 'one-place settlement' of the displaced community in the valley of Kashmir.

The National Human Rights Commission (NHRC) in the case of genocide and human rights violations against the displaced community filed by this author in March 1994 in its decision in the Commissions's court in June 1999 said that the 'Community of Kashmiri Pandits was not given the due understanding and relief that they deserved'. It also said that 'the Commission is constrained to say that the acts akin to genocide were committed against the Kashmiri Pandits in the valley and.....a genocide type design may exist in the minds and utterances of the militants and terrorists against the Kashmiri Pandit community'. The governments and the administration failed to do what they were supposed to do for the victims of genocide in Kashmir even after their displacement from Kashmir. The Delhi High Court described the displacement as the ethnic cleansing.

The responsibility for their genocide rests with the Islamic fundamentalist and terrorist forces sponsored by Pakistan in Kashmir along with the cunning politicians who worked hands in glove with the radical elements in the valley to execute ethnic cleansing. The J&K government led by Farooq Abdullah connived with the conspirators to implement their planning of forced mass-exodus from Kashmir. Equally responsible is the government of India for its failure to take effective measures to stop the unfortunate happenings against the miniscule minority community in Kashmir for decades despite getting all intelligence and official reports about the same.

The struggle for existence of the Kashmiri Pandit community continues for the last more than three decades though generations changed over all these 36 years. The spirit of the struggle stands unfazed among the members of the exiled community. In continuation of the struggle, the prominent leaders and activists also struggled for the reservation of seats for the exiled Kashmiri Pandit community in the J&K Legislative Assembly so that the community was represented at the highest political platform. This important issue was taken up by this author and represented before the Delimitation Commission along with the other community key activists, thinkers and intellectuals. The Commission was convinced with the arguments put before it and it recommended nomination of two seats in the Assembly for the Kashmiri Pandit community. Thereafter in December 2023, the parliament adopted an amendment to the J&K Reorganisation Act 2019 paving way for the nomination of 5 members to the J&K Assembly including two members from the displaced community.

In September-October 2024, the elections for the J&K Assembly were held and the Assembly was constituted. It is now fifteen months that the Assembly stands constituted and functional, but the nomination of the members, that has parliamentary sanction, has not been made till date. In case the government was unable to take a decision in this regard due to some court case pertaining to the nominations, it should have been guided by the Supreme Court judgement in the case of nominations to the Puducherry Assembly which upheld the nominations. Moreover, no court has granted any stay to these nominations by the government.

Integration of ocean science and biotechnology to strengthen India's economy, environment, and employment: Dr Jitendra Singh

New Delhi, Jan 18 (UNI) Union Minister of State (Independent Charge) for Science & Technology, Earth Sciences, and MoS PMO, Personnel, Public Grievances, Pensions, Atomic Energy and Space, Dr Jitendra Singh said this today while on a visit to the Atal Centre for Ocean Science and Technology for Islands (ACOSTI) to launch and review key marine technology initiatives aimed at strengthening the Blue Economy and livelihoods in the Andaman & Nicobar Islands.Addressing scientists, officials and stakeholders on the occasion, the Minister said India's future economic value addition will increasingly

come from untapped marine resources as the country moves rapidly towards becoming one of the world's top economies. He highlighted that Government's strong focus on the Blue Economy reflects Prime Minister Narendra Modi's vision that India cannot develop in isolation by focusing only on the mainland while leaving behind island territories and coastal regions.

The event was held at Atal Centre for Ocean Science and Technology for Islands, a unit of National Institute of Ocean Technology, under the Ministry of Earth Sciences, at Dollygunj, Sri Vijaya Puram (Port Blair). The programme was attended by Shri Bishnu

Pada Ray, Hon'ble Member of Parliament from Andaman & Nicobar Islands, Dr. M. Ravichandran, Secretary, Ministry of Earth Sciences, senior officials of the Andaman & Nicobar Administration, scientists from NIOT and other research institutions, and representatives from local departments and Self-Help Groups.

Praising the consistent and energetic representation of the Andaman & Nicobar Islands in Parliament, the Minister said that sustained advocacy has ensured that national attention and resources are directed towards island development. He recalled that since 2014, the Prime Minister has given

the highest priority to the North Eastern region and island territories, a shift that is now clearly visible in the scale of scientific, administrative, and ministerial engagement in the region.

Referring to the Deep Ocean Mission, Dr. Jitendra Singh said it was a matter of pride that the Prime Minister announced the mission not once but twice from the ramparts of the Red Fort, underscoring India's commitment to the Blue Economy. He highlighted that marine resources, long under-explored, will play a decisive role in sustaining India's growth trajectory as conventional resources get exhausted. The Blue Econo-

my, he said, will significantly contribute to employment generation, exports, environmental sustainability, and overall economic resilience. The Minister highlighted key initiatives launched and demonstrated during the programme, including the pilot-scale open sea cage culture of marine fish and large-scale seaweed cultivation.

Dr. Jitendra Singh said the initiatives demonstrated at ACOSTI would help translate India's marine scientific capabilities into practical economic opportunities for island communities. He emphasised the need to expand modern aquaculture, seaweed cultivation and

other ocean-based activities while ensuring sustainable use of marine resources. Such interventions, he said, can create new livelihood avenues for fishermen, Self-Help Groups and local entrepreneurs.

The Minister also underlined the importance of integrating scientific research with local needs and strengthening the participation of island communities in emerging marine technologies. He said the Andaman & Nicobar Islands, with their strategic location and rich marine resources, have significant potential to become a hub for innovation, sustainable fisheries and blue-economy activities.

India has world's lowest data costs, highest data usage: Scindia

New Delhi, Jan 18 (UNI) Union Communications Minister Jyotiraditya Scindia on Saturday said that India now has world's lowest data costs and highest data usage, driven by robust digital infrastructure. There are more than 120 crore mobile users in the country and the 4G network is expected to reach every village by June this year.

"World's lowest data costs, world's leading data usage India's digital revolution led by PM Narendra Modi is truly built for its people," the minister posted on X social media platform. BSNL has installed a total of 97,068 4G sites, and 93,511 sites are 'On-Air' (till October 31, 2025). The state-run telecom operation aims to upgrade all 4G towers to 5G within the next few months. Meanwhile, the 5G services have been rolled out in all states and union territories (UTs) across the country and presently, these are available in 99.9 per cent of the districts. As on October 31, telecom service providers (TSPs) have installed 5.08 lakh 5G Base Transceiver Stations (BTSS) across rural and urban area of the country.

More than 31 lakh Base Transceiver Stations (BTSS) have been installed across the country. To reduce call drops and improve internet connectivity in underserved areas, the government has taken several initiatives, like BharatNet project for providing broadband connectivity in Gram Panchayats (GPs) and villages.

Western Disturbance, calm winds and highly unfavourable meteorological conditions are the causes of degrading AQI in the region

New Delhi, Jan 18 (UNI) Today, Delhi's daily average AQI clocked 400 at 4PM, as per the Daily AQI Bulletin by Central Pollution Control Board (CPCB), which further rose to 428 today at 8PM. In view of the rising trend in AQI owing to Western Disturbance, calm winds and highly unfavourable weather/ meteorological conditions in the region, the Sub-Committee on Graded Response Action Plan (GRAP) of the Commission for Air Quality Management in NCR and Adjoining Areas (CAQM) called on an urgent meeting today in the evening.

Keeping in view the prevailing trend of air quality

and in an effort to prevent further deterioration of air quality in the region, the Sub-Committee on GRAP today has taken the call to proactively invoke all actions as envisaged under Stage-IV of extant GRAP – 'Severe+' Air Quality (Delhi's AQI > 450), with immediate effect in the entire NCR. This is in addition to the preventive/ restrictive actions mentioned under Stage-I, II and III of extant GRAP already in-force. Various agencies responsible for implementing measures under GRAP and Pollution Control Boards (PCBs) of NCR and DPCC have also been advised to ensure strict implementation of actions

under Stage-IV of extant schedule of GRAP in addition to all actions under Stage-I, II, III of extant GRAP already in force, during this period.

A 5-point action plan as per Stage-IV of extant GRAP is applicable with immediate effect in the entire NCR. This 5-point action plan includes steps to be implemented/ ensured by different agencies and Pollution Control Boards of NCR and DPCC. These steps are: Stop entry of BS-IV truck traffic into Delhi (except for trucks carrying essential commodities/ providing essential services.)

All LNG/ CNG / Electric/ BS-VI Diesel trucks shall however be permitted to en-

ter Delhi. Enforce strict ban on plying of Delhi - registered diesel operated BS-IV and below Heavy Goods Vehicles (HGVs) in Delhi, except those carrying essential commodities / providing essential services. Ban C&D activities, as in the GRAP Stage-III, also for linear public projects such as highways, roads, flyovers, overbridges, power transmission, pipelines, tele-communication etc. State Govts. in the NCR and the GNCTD to mandatorily conduct classes in schools for children even for higher classes i.e.

from class VI to IX and XI in a "Hybrid" mode i.e., both in physical and online mode (wherever online mode is

feasible) in the territorial jurisdiction of the NCT of Delhi and in the districts of Gurugram, Faridabad, Ghaziabad and Gautam Buddha Nagar. The NCR State Governments may also consider conducting classes for students as above in a "Hybrid" mode in other areas in NCR.Note: The option to exercise the online mode of education, wherever available, shall vest with the students and their guardians.

State Governments may consider additional emergency measures like closure of colleges/ educational institutions and closure of non-emergency commercial activities, permitting running of vehicles on odd-even.

AIIA Celebrates National Startup Day 2026 with Awareness Programme on MSME Opportunities for Ayurveda-based Startups

New Delhi, Sept 10 (GNS): On the occasion of National Startup Day 2026, the All India Institute of Ayurveda (AIIA), through its startup incubation centre Incubation Centre for Ayurveda Innovation and Entrepreneurship (AIIA-iCAINE), successfully organized an Awareness Programme on MSME Opportunities for Ayurveda-based Startups at its New Delhi campus. The programme was conducted in collaboration with the MSME-Development & Facilitation Office, Government of India.

The programme brought together policymakers, academic leaders, startup enablers, and aspiring entrepreneurs to deliberate on strengthening the MSME

and startup ecosystem, with a special focus on Ayurveda and integrative health innovations. The sessions highlighted government support schemes, institutional mechanisms for innovation, intellectual property protection, certification and standardization requirements, and financial mechanisms essential for early-stage startups. The programme commenced with a welcome address by Dr. Arun Kumar, setting the context for innovation-driven entrepreneurship in Ayurveda. Shri Sunil Kumar, Deputy Director, MSME, provided an overview of MSME initiatives and government schemes relevant to Ayurveda-based enterprises. Prof. Manju-

sha Rajagopala shared the academic and institutional perspective on fostering innovation and entrepreneurship within Ayurveda institutions. The keynote address was delivered by Dr. R. K. Bharti, Joint Director, MSME, who emphasized the need for a strong policy-supported ecosystem to promote startups and MSMEs, particularly in traditional medicine and wellness sectors.

The technical sessions featured expert talks by Ms. Sangeeta Nagar, former Senior Scientist, DPIIT, on Intellectual Property Rights (IPR) and their importance for startups, and Ms. Jyoti Neeraj, Senior Manager, SIDBI, who elaborated on finan-

cial support mechanisms and funding opportunities available for startups and MSMEs. The programme concluded with a vote of thanks by Shri Sujith Eranezhath, CEO, AIIA-iCAINE, and Shri Naveen Kumar, Assistant Director, MSME.

The event reaffirmed AIIA-iCAINE's commitment to nurturing a robust, innovation-driven startup ecosystem rooted in Ayurveda, aligned with national priorities for entrepreneurship, MSME growth, and sustainable healthcare solutions. Recognized as a Host Institute by the Ministry of MSME, Government of India, AIIA-iCAINE continues to empower innovators by providing a structured plat-

form to transform ideas into impactful enterprises. On this National Startup Day, AIIA reiterates its dedication to fostering entrepreneurship and innovation in Ayurveda through AIIA-iCAINE, supporting new-age ventures that contribute to evidence-based, sustainable, and inclusive health solutions.

The programme also provided aspiring entrepreneurs with practical guidance on navigating regulatory and institutional requirements while developing Ayurveda-based products and services. Discussions focused on the importance of quality standards, certification and intellectual property protection in building credibility

and market readiness.

Experts highlighted the growing scope for innovation in Ayurveda, particularly in wellness, preventive healthcare, traditional medicine and integrative health solutions. Participants were encouraged to leverage government schemes and institutional support to convert innovative ideas into sustainable ventures.

The initiative is expected to further strengthen collaboration among Ayurveda institutions, government agencies, financial institutions and startups, creating new opportunities for entrepreneurship and employment while promoting evidence-based Ayurveda innovations.

Maruti Suzuki India to invest Rs 35,000 cr to develop new plant in Gujarat

Gandhinagar, Jan 18 (UNI) Maruti Suzuki India Limited (MSIL) will invest Rs 35,000 crore to development a new plant in Khoraj, Gujarat which will have a total annual production capacity of 10 lakh vehicles, it was announced here on Saturday.

Chief Minister Bhupendra Patel said in a post on X that the project will generate employment opportunities for over 12,000 people and catalyse the growth of ancillary units and MSMEs in the state -- creating a robust auto manufacturing cluster.

Maruti Suzuki MD Shriyut Hitachi Takeuchi handed over the investment letter to Chief Minister during a ceremony held in Gandhinagar.

PM-SETU initiative aims to modernise 1,000 govt ITIs

New Delhi, Sept 10 (GNS): The PM-SETU (Pradhan Mantri Skilling and Employability Transformation through Upgraded ITIs) initiative seeks to modernise 1,000 government ITIs across the country through a hub-and-spoke approach, with 200 hub ITIs supported for advanced infrastructure and modern training facilities, and 800 spoke ITIs extending training reach across districts, it was announced on Saturday.

The Ministry of Skill Development and Entrepreneurship (MSDE), in partnership with the Maharashtra government, is set to hold a major industry consultation in Pune as part of the rollout of PM-SETU. The initiative

was announced by Prime Minister Narendra Modi recently in line with the vision of Viksit Bharat, aimed at building a future-ready, globally competitive workforce. The event is intended to mobilise industry participation and build awareness about the scheme's industry-led implementation framework. According to the Ministry of Skill Development and Entrepreneurship, over 50 eligible companies will participate, representing sectors such as construction, textiles, automotive, FMCG, electronics, oil and gas, and renewable energy. The scheme positions ITIs as government-owned but industry-managed institutions, enabling demand-driven training.

Wings India 2026 Set to Soar: Asia's Largest Civil Aviation Event to Showcase the Future of Global Aviation

New Delhi, Sept 10 (GNS): Wings India 2026, Asia's largest civil aviation event, will be formally launched with a grand inaugural ceremony led by Minister of Civil Aviation Shri Rammo-han Naidu, in the presence of high-level dignitaries from India and abroad. The launch will mark the beginning of a landmark four-day global aviation gathering scheduled to be held from 28 to 31 January 2026 at Begumpet Airport, Hyderabad. Anchored around the theme "Indian Aviation: Paving the Future – From Design to Deployment, Manufacturing to Maintenance, Inclusivity to Innovation and Safety to Sustainability", Wings India 2026 will highlight India's

rapidly expanding aviation landscape, its growing global footprint, and its vision to emerge as a key hub for manufacturing, services, innovation and sustainable aviation solutions.

Wings India 2026 will feature an expansive international exhibition, static aircraft displays, flying and aerobatic shows, a high-level international conference, CEO roundtables, B2B and B2G meetings, an aviation job fair, awards ceremony, and vibrant cultural programmes. Delegates and participants from across the world are expected, reinforcing the event's stature as a premier global aviation forum. Prominent domestic and international stakehold-

ers from across the aviation value chain will participate, including airlines, aircraft and engine manufacturers, MROs, airport developers, OEMs, technology providers, training institutions and service partners. The event will serve as a convergence point for policymakers, industry leaders, innovators and investors to deliberate on emerging trends, opportunities and collaborative pathways shaping the future of civil aviation in India and worldwide.

The international conference will feature 13 thematic sessions, in addition to the Global CEOs Forum and Ministerial Plenary, covering key areas such as Airports, Aircraft Leasing, Helicopters,

Airlines, Women in Aviation, MRO, Air Cargo Transportation, Business Aviation and Small Aircraft, Aircraft Component Manufacturing, Sustainable Aviation Fuel (SAF), Flying Training and Skilling, Advanced Air Mobility and Drones. Strong International and State Participation

Wings India 2026 will witness ministerial-level foreign delegations and senior government officials from several countries, along with official delegations from more than 20 countries, reinforcing international cooperation and collaboration in the aviation sector. Active participation from Indian states will showcase aviation-led growth, investment oppor-

tunities and infrastructure development across the country. Spectacular Air Shows and Aircraft Displays

Wings India 2026 will feature impressive static aircraft displays, flying displays and aerobatic air shows, showcasing a wide range of aircraft. Highlight attractions include aerial performances by the Surya Kiran Aerobatic Team of the Indian Air Force.

The event will provide dedicated platforms for exhibitions, chalets, and B2B/ B2G meetings, enabling business networking, partnerships and investment discussions. An Aviation Job Fair will connect industry leaders with young professionals and skilled talent across the aviation ecosys-

tem. A specially curated Civil Aviation innovation Challenge for students will be organised to promote innovation, problem-solving and industry-oriented thinking among students and young professionals, providing them exposure to real-world aviation challenges and opportunities.

The event will also feature vibrant Cultural Programme reflecting India's rich heritage, adding a unique experiential dimension for delegates and visitors alongside the aviation showcases.

A prestigious Award Ceremony, continuing the tradition of recognising excellence and outstanding contributions in civil aviation will also be held.

14th CMS VATAVARAN Nomination Jury Concludes at MANUU in Hyderabad

900+ films from 82 countries: Hyderabad prepares to host Asia's largest environmental film festival for the first time, with (58) films nominated for the 14th CMS VATAVARAN.

Hyderabad, Sept 10 (GNS): The three-day Nomination Jury process for the 14th CMS VATAVARAN International Environment and Wildlife Film Festival concluded today at the Instructional Media Centre of Maulana Azad National Urdu University in Hyderabad. Organised from 8 to 10 September 2026, the process was held in partnership between CMS VATAVARAN and IMC, MANUU. The process was inaugurated on 8 September by Prof. Syed Ainul Hasan, Honorable Vice-Chancellor, MANUU. The inaugural session brought together Dr. Vasanti Rao, Director General, Centre for Media Studies; Mr. Rizwan Ahmad, Director, Instructional Media Centre, MANUU; members of the Nomination Jury; student jurors; and the jury coordination and technical teams.

"Environmental questions cannot remain confined to classrooms or specialist discussions. Cinema helps young people see these questions in human terms and encourages them to think, question and participate. MANUU is pleased to partner with CMS VATAVARAN and to give our students direct exposure to this international process," said Prof. Syed Ainul Hasan, Vice-Chancellor, MANUU. The 14th edition received more than 900 films from 82 countries across its national and international competitive categories. After the initial peer review, 286 films advanced to the Nomination Jury. Twenty-eight jury members, supported by student jurors and coordinators, worked through seven jury committees to view the assigned films in full and assess them

under the Festival's evaluation framework. Following the deliberations, [58] films were nominated for the next stage of the awards process. "Receiving more than 900 films from 82 countries tells us how widely environmental stories are now being documented. The Nomination Jury had the difficult responsibility of giving 286 films the time and attention they deserved. The films selected here will bring many different environmental realities, voices and solutions to audiences in Hyderabad this December." said Dr. Vasanti Rao, Director General, Centre for Media Studies, and Global Co-Chair, IUCN #NatureForAll. The seven committees included filmmakers, media professionals, academics and representatives from the conservation and social sectors.

TOMCOM set target of 10,000 overseas placements for TG youth

Hyderabad, Sept 10 (GNS): Chief Secretary Sanjay Jaju has directed the officials of the Telangana Overseas Manpower Company (TOMCOM) to prepare a comprehensive action plan to facilitate 10,000 overseas placements for the youth of Telangana during the current year. The Chief Secretary conducted a review meeting on the functioning and activities of TOMCOM at the Secretariat here today. He reviewed the progress made by the organization in facilitating overseas employment opportunities and discussed measures to significantly scale

up its operations. The Chief Secretary emphasised that the primary objective of TOMCOM should be to create more employment opportunities for the youth of the State by connecting them with legitimate and suitable job opportunities in foreign countries. He directed the officials to adopt a focused and outcome-oriented approach to achieve the target of 10,000 overseas placements. Sanjay Jaju instructed the officials to identify countries, sectors and occupations where there is a growing demand for skilled manpower and accordingly design placement-oriented programmes for

boarded with TOMCOM as principal partners for identifying suitable candidates, providing necessary training and facilitating their placement abroad. He stressed that partnerships with private agencies should help TOMCOM reach a larger number of youth across the State while ensuring transparency, credibility and adherence to prescribed procedures. The Chief Secretary called for greater emphasis on skill-based overseas employment, particularly by aligning training programmes with the manpower requirements of international markets. Under the proposed framework, eligible private agencies could be on-

A big responsibility, says Madhu Goud Yaskhi on appointment as AIPC Chairman

Hyderabad, Sep 10 (GNS): Former Lok Sabha MP from Telangana, Madhu Goud Yaskhi, said on Thursday that he views his appointment as the Chairman of All India Professionals' Congress (AIPC) as a big responsibility to fulfil the vision of Rahul Gandhi in making AIPC the bridge that connects India's professionals to politics, policymaking, and nation-building. He took to social media to convey 'sincere gratitude' to Congress President Mallikarjun Kharge and Rahul Gandhi for entrusting him with the responsibility of Chairman, All India Professionals' Congress. "I see this not as a position, but as a big responsibility; to fulfil the vision of Rahul Gandhi in

making AIPC the bridge that connects India's professionals to politics, policymaking, and nation-building," he said in a post on X. Earlier, while thanking Telangana Pradesh Congress Committee (TPCC) President Mahesh Kumar Goud for congratulating him on his appointment, Madhu Goud Yaskhi said he wishes to work together to strengthen the Congress Party and make Rahul Gandhi the Prime Minister. "Thank you, Mahesh Goud Garu. With the love, support, and cooperation of all of you, I sincerely wish to work together to strengthen the Congress Party from the state level to the national level and to make Shri Rahul Gandhi Garu the Prime Minister of India," Yaskhi said. "Let us all be united and work together towards this goal," he added. Meanwhile, Yaskhi met Telangana Assembly Speaker Gaddam Prasad Kumar in the Assembly on Thursday. In the context of the recent developments at the Assembly and the inappropriate remarks made against the Speaker, Yaskhi conveyed his solidarity to Prasad Kumar.

Inspire education academy holds certificate distribution programme

Hyderabad: Inspire Education Academy, Warasiguda, organised a certificate distribution programme for students who successfully completed their SSC, Intermediate and other courses through Open, Distance and Online modes. Advocate Mir Qurram Ali, along with Chairman Mohammed Arbaaz, congratulated the students and encouraged them to pursue higher education. Qurram Ali said, "Online and flexible education is a great opportunity for the youth of the Old City to continue their studies and compete with students across the country."

Indiramma Sewing Scheme: Apply by Sept 13

Hyderabad, Sept 10 (GNS): District Collector Dr. Priyanka Ala stated that the Telangana government is implementing the 'Intintaa Indiramma Kuttu Mission' (Indiramma Sewing Machine Scheme) to create self-employment opportunities and foster economic empowerment for BC women. She noted that under this scheme, the government provides sewing machines to eligible BC women, encouraging them to achieve self-employment by working from home. She mentioned that online applications are currently being accepted from eligible BC women. The Collector announced that the online application process will continue until

September 13. She advised eligible BC women to apply within the stipulated deadline without delay. Applications can be submitted via the website tgobmms.cgg.gov.in. She urged applicants to enter the required details accurately and complete the process within the specified timeframe.

Appeal for Resolution of Christian Minority Issues

Hyderabad, Sept 10 (GNS): At the Christian Minority Finance Corporation office in Nampally, Hyderabad, Christian Minority Finance Corporation Coordinator Smt. Asma met Telangana State Christian Minority Finance Corporation Chairman Sri Deepak John and submitted an appeal seeking the resolution of various issues concerning the Christian minority community. Speaking on the occasion, Smt. Asma said that pastors and church committee members from several villages had personally approached her, bringing to her notice that many churches were in a dilapidated condition, while some churches did not even

have proper land or premises. They requested assistance for the development and renovation of churches. She informed Chairman Sri Deepak John that over the past few days, she had personally visited several churches across the Zaheerabad Assembly constituency and witnessed their poor and distressing conditions. The major issues highlighted in the appeal included: Financial assistance for the construction of new churches. Funds for the repair and renovation of old churches. Allocation of land for the construction of new churches. Allocation of land for Christian burial grounds. onstruction of compound walls around burial grounds.

Elaborate Arrangements to Ensure Smooth Paddy Procurement, Advance measures should be taken to avoid inconvenience to farmers.

Sangareddy, Sept 10 (GNS): District Collector Prateek Jain directed officials to make elaborate arrangements with advance planning to ensure the smooth procurement of paddy cultivated by farmers during the current Vanakalam (Kharif) season through procurement centres. He instructed officials of the concerned departments and procurement centre operators to work in coordination and with dedication to ensure that farmers face no difficulties during the procurement process. On Thursday, the Collector, along with Additional Collector T.L. Sangeetha, held a preparatory meeting with officials of the concerned departments and

transport contractors at the Mini Conference Hall of the Collectorate regarding paddy procurement for the 2026-27 Vanakalam season. Speaking on the occasion, the Collector said that

227 paddy procurement centres across the district. He instructed officials to establish separate procurement centres, as required, for fine varieties and coarse varieties of paddy. The Collector directed officials to ensure that procurement centres were made available in the respective areas by the time farmers' crops were ready for harvesting. He also called for extensive awareness programmes to educate farmers to bring paddy conforming to the quality standards prescribed by the government to procurement centres so that they could receive the full Minimum Support Price (MSP).
